PROFESSIONAL SUMMARY

Full-stack software engineer with 2+ years of industry experience building and shipping production-grade web and mobile applications. Delivered a real-time fintech trading platform at Corestrat using React, Redux, Flutter, and Azure; brings strong cloud-native awareness from 2 years of infrastructure engineering at LTI. Comfortable owning features end-to-end — from API design and state management to containerised deployment and monitoring.

EDUCATION

CHRIST (Deemed to be University) <i>Master of Computer Applications, 73%</i>	Bangalore 2024 – 2026
Saintgits College of Applied Sciences <i>Bachelor of Computer Application, 84.2%</i>	Kottayam 2019 – 2022

WORK EXPERIENCE

Software Engineer <i>Corestrat</i>	Jan 2026 – Apr 2026
- Built and shipped a production-grade real-time fintech analytics and trading platform across web (React, Redux) and mobile (Flutter), serving end-to-end from data ingestion to UI delivery. - Architected a modular Redux state layer with feature-level reducers and Thunk middleware, reducing API coupling and enabling faster independent module development. - Designed and integrated RESTful APIs for core trading workflows; secured endpoints using Azure API Management with Key Vault-backed secrets management. - Delivered production-grade UX using Material Design with full theming, localisation, secure storage, and responsive layouts across web and mobile surfaces. - Containerised services with Docker and managed cloud deployment on Azure App Service and AKS; set up CI/CD pipelines via Azure DevOps for automated build, test, and release.	
Engineer – Cloud & Infrastructure Services <i>Larsen & Toubro Infotech Ltd. (LTI)</i>	September 2022 – July 2024
- Automated infrastructure provisioning and deployment workflows using Terraform and Azure DevOps Pipelines, reducing manual effort by 40% and enabling repeatable environment builds. - Built and maintained CI/CD pipelines (Azure DevOps, GitHub Actions) supporting automated build, test, and deployment across dev, staging, and production environments. - Scripted operational and system management tasks using Bash and PowerShell, improving team efficiency across Linux and Windows server environments. - Deployed and managed containerised workloads using Docker and Kubernetes (AKS) with Helm chart releases; executed rolling updates with zero downtime. - Implemented observability using Azure Monitor and Application Insights; maintained 99.9% uptime SLA and reduced MTTR by 30% through proactive alerting and RCA-driven incident response.	
Software Development Trainee <i>Bell NewwoTech LLP</i>	July 2021 – October 2021
- Built and deployed a portfolio website using HTML/CSS and WordPress. - Contributed to full-stack development using WordPress and CodeIgniter.	

PROJECTS

Trash Buddy – Real-time Waste Collection Tracking Node.js, PostgreSQL, PostGIS, Redis, Socket.io, Flutter, Docker, Firebase
- Designed and built a full-stack real-time vehicle tracking system — Node.js backend, Flutter mobile client, and PostgreSQL with PostGIS for geospatial queries (radius and polygon filtering). - Implemented bidirectional real-time communication using Socket.io and proximity-based push notifications via Firebase FCM.

- Applied Redis caching and pub/sub for high-concurrency event broadcasting; containerised backend with Docker and deployed behind Nginx with SSL termination.

URLShortenerPro – URL Shortening & Analytics | Java, Spring Boot, MySQL, Redis, Thymeleaf, Docker, Azure

- Designed and built a full-stack URL shortening platform — Spring Boot REST API, Thymeleaf UI, MySQL persistence, and Redis caching for high-performance redirection with TTL-based expiry.
- Implemented click analytics capturing IP, user-agent, and referrer metadata, with aggregated usage dashboards and QR code generation for shareable short links.
- Containerised with Docker and deployed to Azure App Service; automated CI/CD via GitHub Actions for build, test, and deploy on every push.

Hand Gesture Recognition for Sign Language | Python, OpenCV, TensorFlow, CNNs

- Developed a real-time ISL gesture recognition system using CNNs, translating gestures into text and speech with 92% accuracy.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Partner: Technical & Sales Accreditation
- Coursera: IBM Cybersecurity Analyst, AI for Everyone, Managing Big Data with MySQL

LEADERSHIP EXPERIENCE

Student Council Member

Christ University, Bangalore

June 2025 – May 2026

University Councillor

Saintgits College of Applied Sciences, Kottayam

June 2021 – July 2022

ACHIEVEMENTS

- Best Outgoing BCA Student (2019–22), Saintgits College of Applied Sciences.
- Published research on lung cancer detection using deep learning at ICAMCTT 2021; featured in IJARTET.
- Presented and authored research on Hand Gesture Recognition for Sign Language Translation (ICETCSMA'25).

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL, Golang, Bash, C/C++, PHP, PowerShell

Frontend / Mobile: React, Redux, Flutter, HTML5, CSS3, Material Design

Backend & Frameworks: Spring Boot, Node.js, Django, REST API Design

Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase

Cloud & DevOps: Azure (AKS, App Service, DevOps, API Management, Key Vault, Monitor), Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Big Data & Analytics: Databricks, ADLS Gen2, Apache Spark, Power BI

ML & Data: TensorFlow, OpenCV, Pandas, NumPy

Tools: Git, Postman, Nginx, Helm

Operating Systems: Linux/UNIX, Windows Server
